(54) PACKAGING BODY OF CYLINDRICAL BODY

(57)Abstract:

PROBLEM TO BE SOLVED: To narrow the occupied space of a storage place by preventing a bulky condition before packaging a packaged body in packaging a flat plate sheet such as a desk mat in a spirally winding manner.

SOLUTION: The packaging body comprises a film packaging tube 1 having the diameter to surround an outer circumferential surface of a cylindrical object 3 to be packaged and the length larger than that of the object 3, and a pair of caps 2, 2 fitted to both ends in a condition where the object 3 is packaged. Both ends of the packaging tube 1 are respectively folded inside both ends of the object 3 to be packaged, the caps 2, 2 are fitted to the outside of a folded part 10, and adhered to the packaging tube 1 by a pressure sensitive adhesive double coated sheet 7 adhered to an inner end face of each cap 2.
